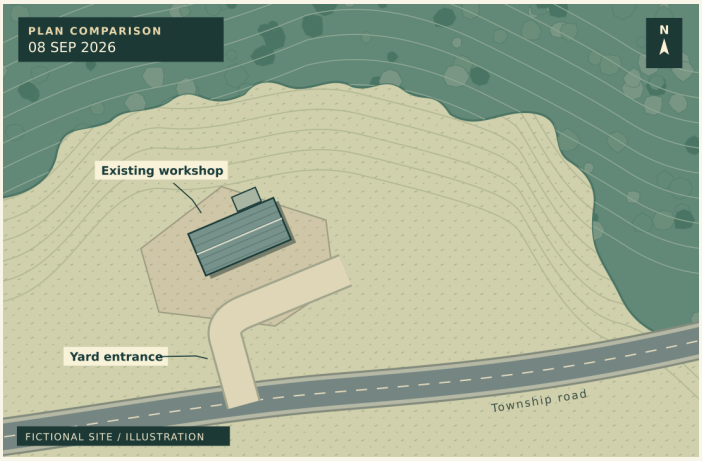
Maple Run contractor yard

Eastern Pennsylvania / September 8 and October 6, 2026

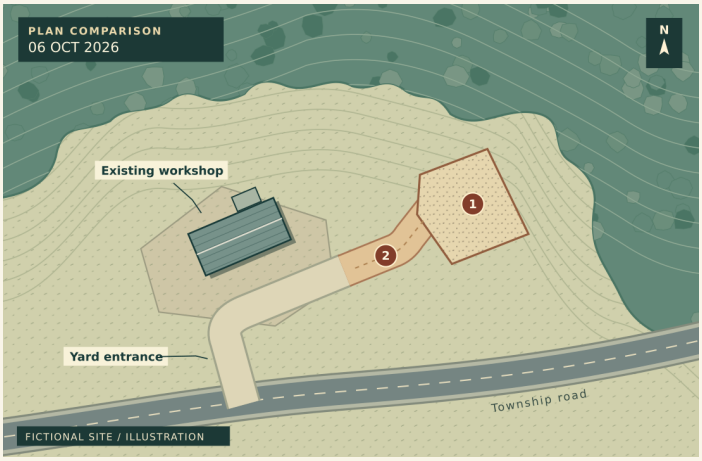
Two observations, four weeks apart

The October illustration shows a gravel laydown pad east of the workshop and a new section of access lane connecting that pad to the existing yard.

A / SEPTEMBER 8



B / OCTOBER 6



What changed

1 **Gravel laydown pad**

The September plate shows open ground east of the workshop. In October, the same area contains an outlined gravel pad.

2 **Access lane extension**

In September, the lane ends just beyond the workshop. In October, it continues northeast from that endpoint to the pad.

How to read these plates

Both diagrams use one viewpoint, orientation and drawing scale. All features and dates are illustrative. No field imagery, survey control, measurements or quantities were collected.
